

Embark upon a magnificent voyage that will take you from the heights of the heavens, to the depths of the seas, from ancient history, to modern miracles ...

TIME Great Discoveries

The most magnificent of all ancient Egyptian masks. It is made of solid gold, with inlaid eyes of quartz and obsidian. It is the most magnificent of all ancient Egyptian masks. After 33 centuries, it is still as vibrant as the day it was buried.

When Saturn Was

For a long time, Saturn was considered the most distant planet in our solar system. It was discovered in 1610 by Galileo Galilei. It was the first planet to be discovered with a telescope. It was the first planet to be discovered with a telescope. It was the first planet to be discovered with a telescope.

The Rings of Saturn

The rings of Saturn are made of ice and rock. They are the most prominent feature of the planet. They were discovered in 1610 by Galileo Galilei. They were the first planet to be discovered with a telescope. They were the first planet to be discovered with a telescope. They were the first planet to be discovered with a telescope.

Peer through the lens of science and glimpse a world filled with fantastical phenomena, breathtakingly beautiful sights, and life in all of its glorious variety!

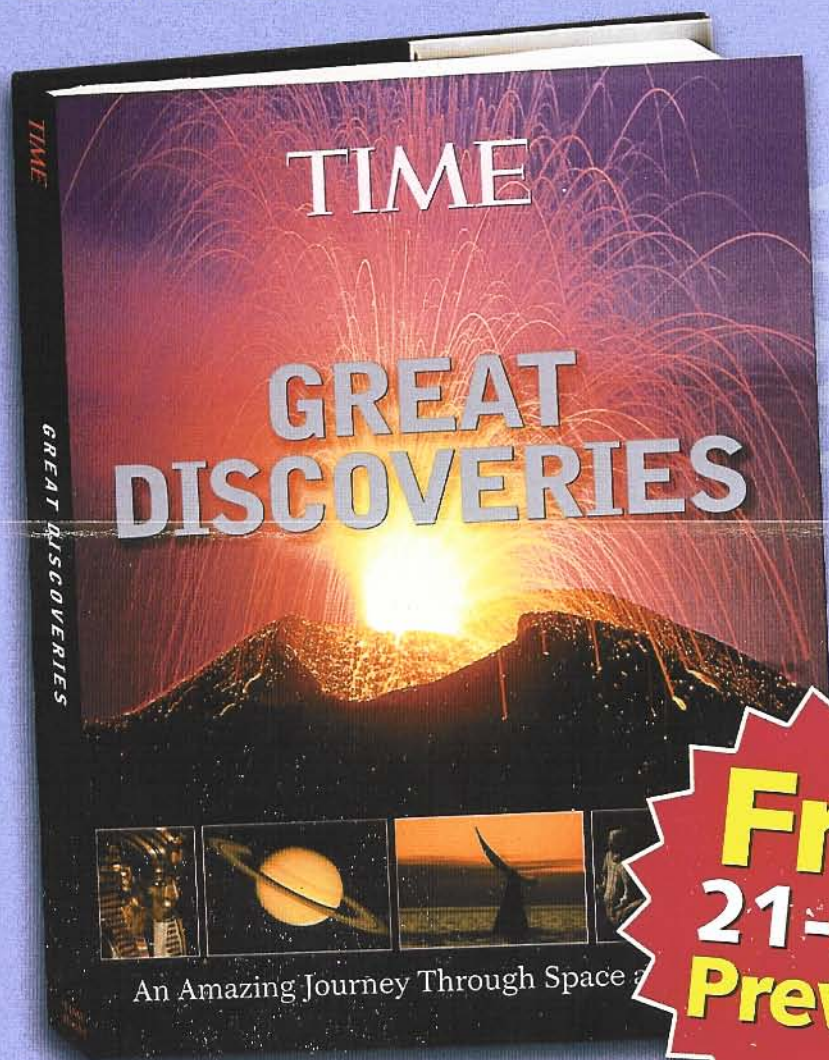

Enjoy The Thrill Of Discovery

Step out onto an icy farm field in 1926 with Robert Goddard and feel your spirits soar as his first rocket screams into the sky at 60 m.p.h. Be there as ancient stones are moved and modern society gets its first look at the gold-filled tomb of an age-old king — Tutankhamen. Hide in the bush with Jane Goodall as she witnesses, for the first time, a chimp exhibiting extraordinary human-like behavior!

Join one scientist after another as they leave the laboratory behind to become

pioneer, adventurer, explorer. From seeing the birth of a star, to exploring the mysterious deaths of ancient societies ... from digging for dinosaur bones in the blazing desert to diving for treasure in the murky depths of the world's oceans — you'll feel the spine-tingling rush that comes each time a new mystery is solved, a new way of thinking is brought forth, new light is shed on dark and distant enigmas.

And you can experience it all **FREE**, for three full weeks!

Listen As The Universe Whispers Its Secrets To Us

When we understand what happened to a lost race of people ... uncover a new source of powerful medication in the rain forest ... enter an environment that was previously off-limits to us ... it is because we have listened and observed our world carefully, intently, and with extraordinary discipline. Time's **GREAT DISCOVERIES** will allow you to eavesdrop on the exact moments when our "passion to know" paid off and the world revealed its long-hidden secrets to us.

YOU'LL DISCOVER ...

165 pages filled with quick-reading capsules that introduce you to the biggest personalities, biggest discoveries and biggest leaps forward in the history of science.

Over 200 photos that let you see a world that most people never witness.

Special "Dead End" features that expose the most outrageous hoaxes, bamboozlements, and frauds ever perpetrated in the name of science.

Unique "Galleries" that show you striking images from our interplanetary and earthly worlds - including some of the most awe-inspiring shots from the Hubble space telescope!

Insightful "Profiles" that provide provocative views into the colorful lives of history's greatest scientists.

And much more!
